TO OUR CUSTOMERS IN THE SOUTHERN STATES

If you have had trouble growing Tulips successfully, try planting on the north or east side of the house. A little shade seem to be a big help. In order to avoid warm weather after setting out the bulbs, we recommend planting in November or early December. Soak the ground thoroughly in dry weather. Follow the same instructions for Hyacinths and Narcissus, except the latter should be planted in October or early November.

TULIPS

Plant 6 to 8 inches deep in soil; planting may be done from October until early December. Recommended to protect them from severe cold with about 2 inches of peat moss, decayed manure, or even old leaves and grass.
